

BBP

OrgaAcoustic

QUIET INTO THE FUTURE

“NOISE CATCHER“

- Significant sound insulation in a cost-effective way
- Acoustic inlay made of melamine resin foam
- Modern and elegant hole design
- High flexibility due to variety of colors

WORLD INNOVATION

LESS NOISE IN THE OFFICE

FOR THE HEALTH OF YOUR EMPLOYEES

BBP makes an important contribution to noise abatement and to improving the quality of work with the world's first sound-absorbing plastic front panel OrgaCustic. This product has been developed at urgent customer request in close cooperation with external acoustics experts.

OrgaCustic impresses by a sound absorption coefficient of 95 %.* This value belongs to the highest category of sound absorber class A.

Take the cost-effective opportunity to reduce the sound level especially in open-plan offices and to offer your customers an added value.

Furthermore, our front panel OrgaCustic that is available in different colors stands out with its elegant design and meets even highest environmental requirements because of its fully recyclable plastic material.

CONSIDERABLY QUIETER

*Surface measurement in reverberation chambers according to DIN EN ISO 354, certified by an accredited testing laboratory. Please do not hesitate to ask us for details.
